SOFTWARE & PLATFORM ENGINEERING

COMMERCIAL PROPOSAL · RED SEA SEASON 2026

The booking engine the *Red Sea coast* has been missing.

A production-ready, bilingual commerce platform for coastal operators in Jeddah — events and concerts, beach day passes, yacht and catamaran charters, and waterfront leases. Built for Saudi payments, Saudi compliance, and Saudi guests.

Delivered in 7 days maximum

1 year technical support — 5,000 SAR

Arabic & English, RTL-native

PREPARED FOR

Red Sea Coastal Operators

Marinas · Beach clubs · Charter fleets · Resorts

PREPARED BY

Valid 30 days from issue

01 — THE OPPORTUNITY

Your inventory is perishable. Your booking process isn't built for it.

A sunset cruise berth, a Friday cabana, a Saturday charter slot — every one of them is worth full price until the moment it expires, and nothing after. Most operators on this coast still sell them through WhatsApp threads, Instagram DMs, and a spreadsheet someone updates by hand.

01

Manual booking leaks revenue

Double-booked cabanas, unrecorded deposits, and no-shows you learn about at the gate. Every reconciliation is a phone call.

02

No scarcity, no urgency

When a guest cannot see that 14 of 100 VIP seats remain, there is no reason to book today instead of next week — or at all.

03

Compliance handled off-system

ZATCA VAT invoices, guest ID capture, and Coast Guard manifests assembled by hand for every departure.

04

Arabic treated as an afterthought

A machine-translated page with broken right-to-left layout tells a Saudi guest exactly how much you valued their experience.

THE PROPOSITION

Jeddah Sea is already built. This is not a discovery project or a six-month engagement — it is a working platform, shown in the screenshots that follow, configured to your brand, your inventory, and your marina, and handed over inside seven days.

7 days

MAXIMUM TIME TO
A LIVE STOREFRONT

0%

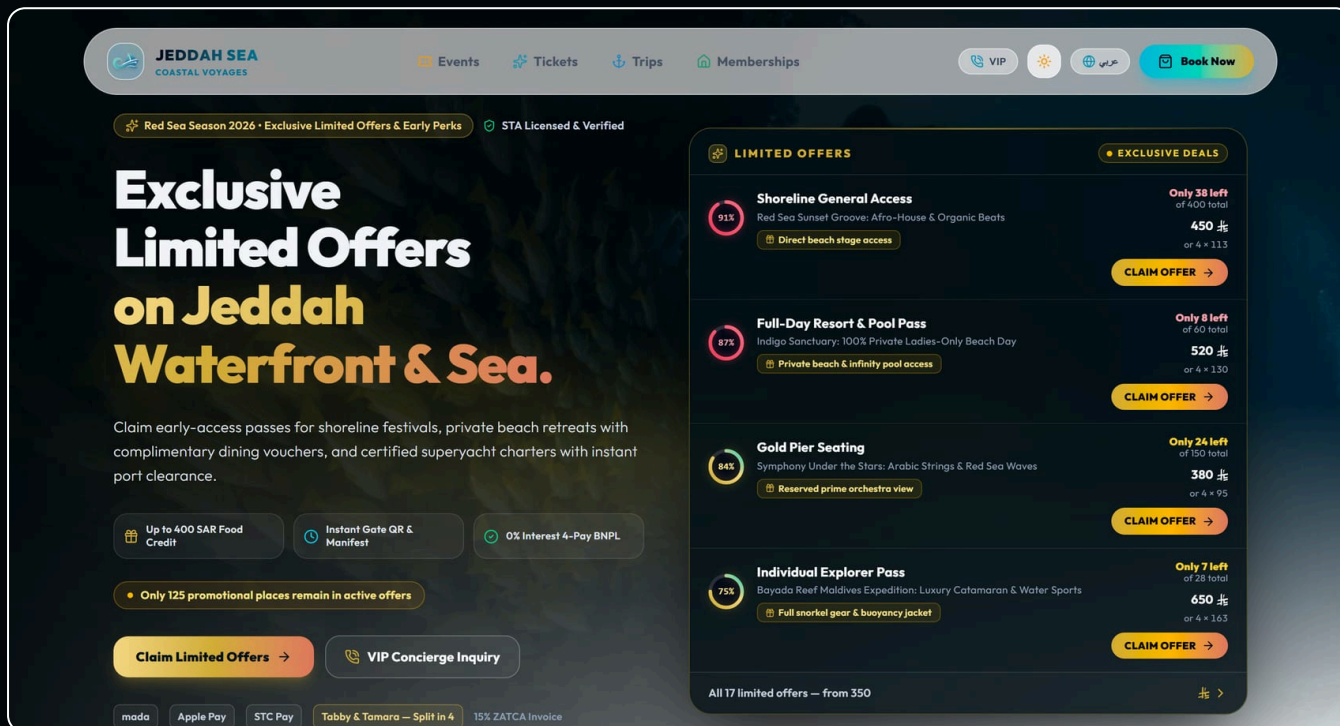

COMMISSION TAKEN
ON YOUR BOOKINGS

The pages that follow walk through the platform as a guest experiences it, then as your operations team runs it, and close with the delivery schedule and commercial terms.

02 — THE PLATFORM

One storefront. Four revenue lines.

Coastal businesses rarely sell just one thing. The platform runs all four categories side by side — each with its own booking logic, its own pricing model, and its own compliance requirements — from a single operator console.

STOREFRONT The live allocation board opens the page with real remaining capacity per tier, claimed percentages, and instalment pricing — scarcity made visible at the moment of intent, not buried three clicks deep.

01

Events

Concerts and shoreline festivals with tiered admission, VIP decks, and private majlis tables.

02

Day Passes

Beach and pool access with ladies-only, family, and mixed privacy modes.

03

Voyages

Yacht and catamaran charters with vessel specs, crew, and departure slots.

04

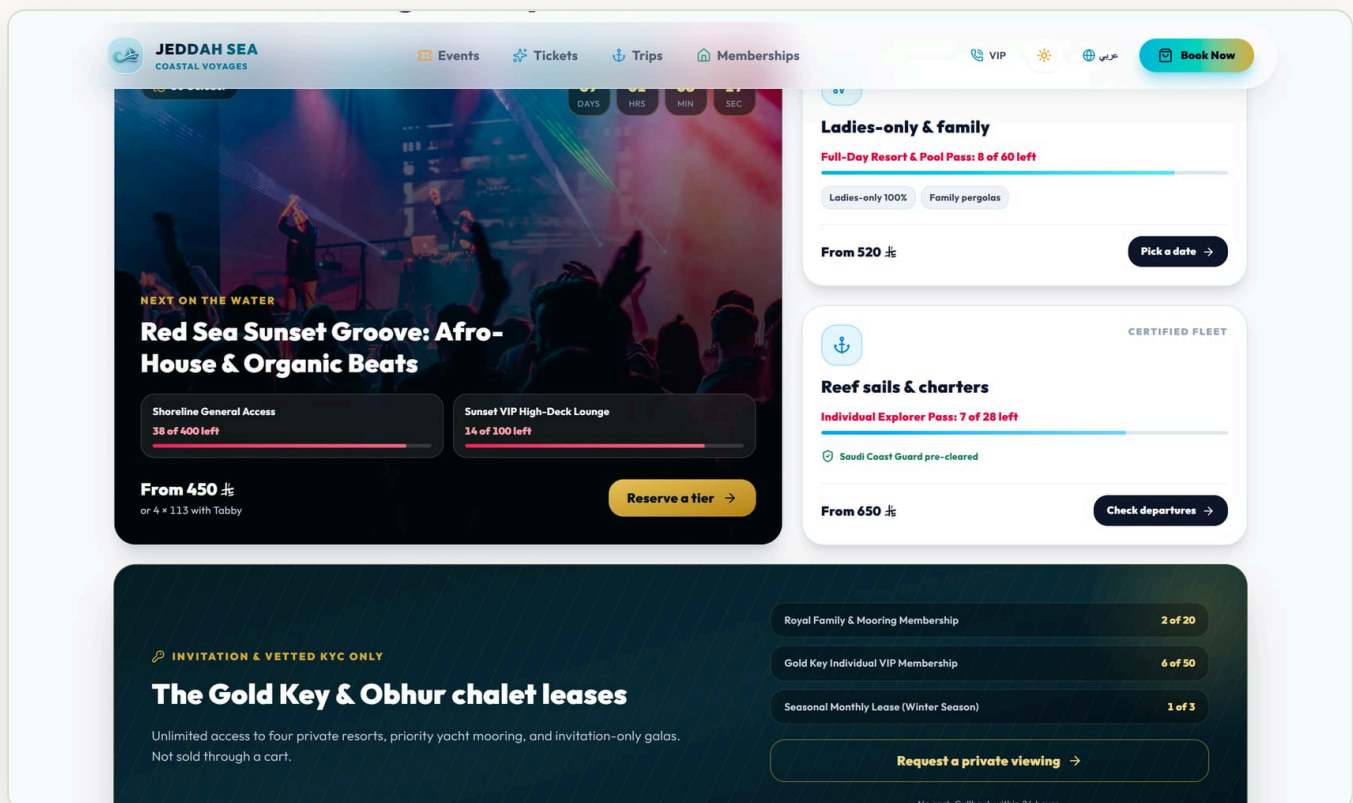

Leases

Overwater chalets and gold-key memberships sold by concierge, not by cart.

03 — SELLING MODEL

Fast lane and slow lane, on the same page.

A 450 SAR beach pass and a 45,000 SAR seasonal chalet lease should not be sold the same way. The platform runs two commercial speeds at once: instant self-service checkout for ticketed inventory, and a vetted concierge callback for high-value assets.

TWO-SPEED Ticketed inventory converts in-session with live remaining counts. Invitation-only inventory — memberships, moorings, chalet leases — is routed to a vetted KYC enquiry with a 24-hour callback promise, never to a public cart.

FAST LANE

Self-service checkout

- Live per-tier remaining capacity
- Add-ons and upgrades at point of sale
- Instant confirmation and digital pass
- Split payment over 4 instalments

SLOW LANE

Concierge enquiry

- No public pricing exposure
- Vetted KYC before viewing
- Private viewing scheduling
- 24-hour callback commitment

04 — YIELD & UPSELL

Sell the same evening at four different prices.

Tiered inventory is where coastal margin actually lives. The same sunset event is sold as a 450 SAR shoreline pass, an 1,100 SAR VIP high-deck seat, and a 7,500 SAR private majlis for eight — with optional concierge and catering attached at checkout.

JEDDAH SEA COASTAL VOYAGES Events Tickets Trips Memberships VIP عربي Book Now

Encrypted digital gate access with real-time capacity and VIP privileges

✓ Instant Confirmation • 48h Refund Guarantee

TIER & SUMMARY Every tier shows live remaining stock and its own perk set. The reservation summary computes 15% Saudi VAT in real time and carries an instant-confirmation and 48-hour refund guarantee into the decision.

- **Scarcity is real, not theatrical.** "Only 2 left" is drawn from the same capacity counter that the door check-in decrements.
- **Add-ons at the point of intent.** Priority valet, caviar platters, and jet-ski packages attach to the order before payment, not after.
- **VAT computed inline.** The guest sees the 15% ZATCA line and the true total before committing — no surprise at the payment step.

05 — MARINE CHARTERS

Charter booking that clears the harbour.

Selling a yacht slot is not selling a ticket. The vessel, the captain, the crew count, the departure window and the guest manifest are all part of the transaction — and the manifest has to satisfy the Coast Guard before the boat leaves the pier.

Coast Guard Maritime Passenger Manifest

1 Passengers Logged

Share companion manifest link via WhatsApp later

Complete booking now and let your guests submit their IDs before departure

Companion Full Name

National ID

ID / Passport Number

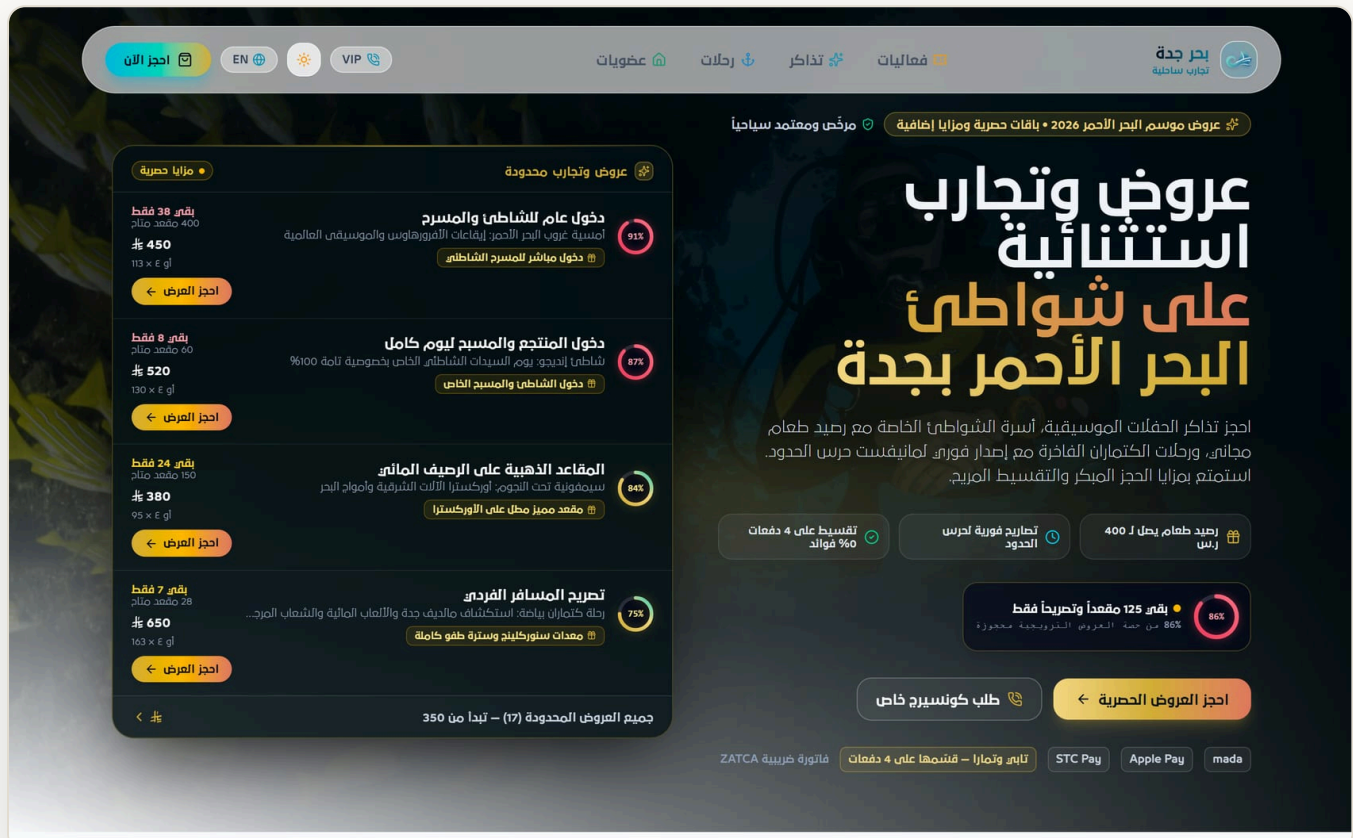

+ Add Companion

MANIFEST CAPTURE The Coast Guard passenger manifest is built inside checkout. Companions are logged by name and ID as they are added, or the manifest link is shared by WhatsApp for guests to complete before departure.

06 — BUILT FOR THE MARKET

Arabic-first, not Arabic-translated.

The entire platform mirrors into true right-to-left layout with a licensed Arabic typeface — navigation, allocation boards, pricing, forms and the operator console. Guests switch locale from any page and keep their position and their cart.

The same landing page in Arabic — the layout is genuinely mirrored, not flipped with CSS hacks. Numerals, currency, capacity rings and instalment copy all follow Saudi conventions.

PRIVACY-AWARE INVENTORY

Day-pass inventory carries a privacy classification — **ladies-only**, **family**, or mixed — that guests can filter on before they see pricing. For a Jeddah beach club this is not a feature; it is the difference between a bookable product and an uncomfortable phone call.

07 — PAYMENTS & COMPLIANCE

The way Saudi guests actually pay.

Checkout supports the full local payment stack, including buy-now-pay-later, which materially widens the audience for a 7,500 SAR majlis table or a 16,675 SAR charter.

15% ZATCA VAT COMPUTED INLINE	4_x INSTALMENTS VIA TABBYY & TAMARA	4 SAUDI ID TYPES ACCEPTED AT KYC	48_h REFUND WINDOW ON TICKETED SALES
--	--	---	---

Compliance handled inside the booking, not beside it

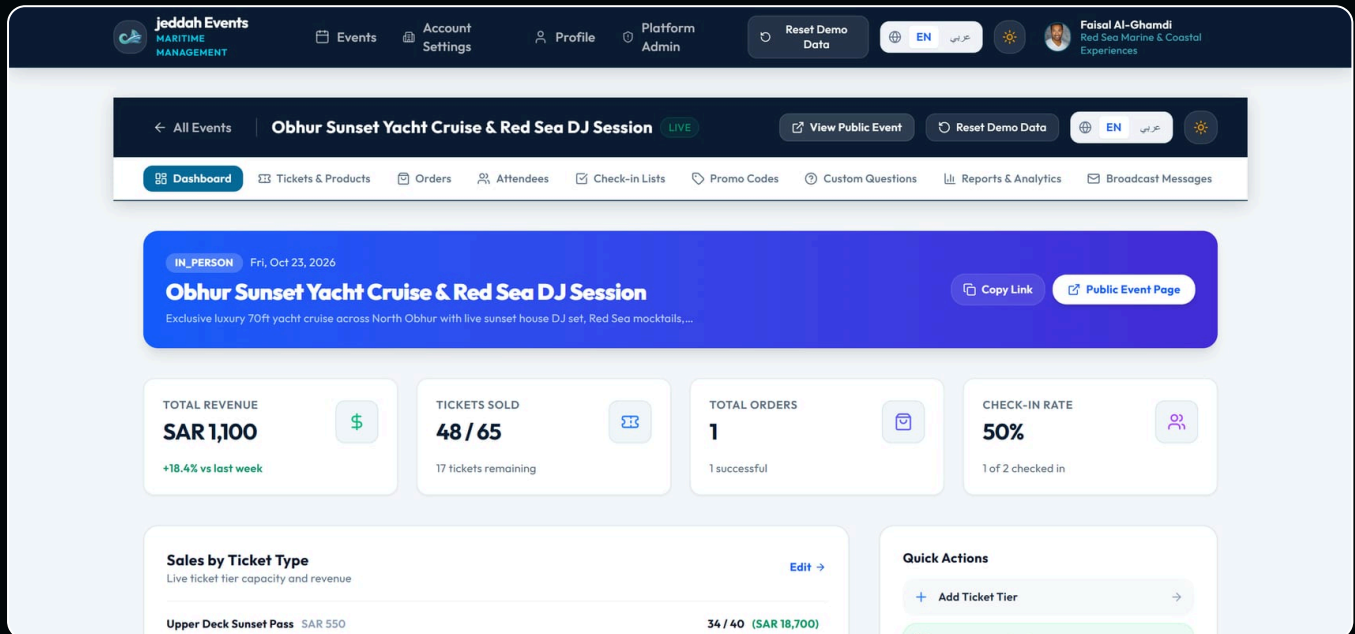

- ZATCA-ready VAT invoicing.** 15% computed and displayed on every order line, carried through to the printable order record.
- Guest identity capture.** National ID, Iqama, GCC ID and passport supported, with the guest manifest assembled as part of checkout.
- Coast Guard manifest generation.** Vessel bookings produce their departure manifest automatically from the guest data already collected.
- Explicit privacy consent.** Terms and privacy acknowledgement captured before payment is authorised.

PAYMENT STEP The live checkout: promo code, ZATCA VAT breakdown, and the six local payment methods on one screen — a 33,350 SAR charter closing without leaving the page.

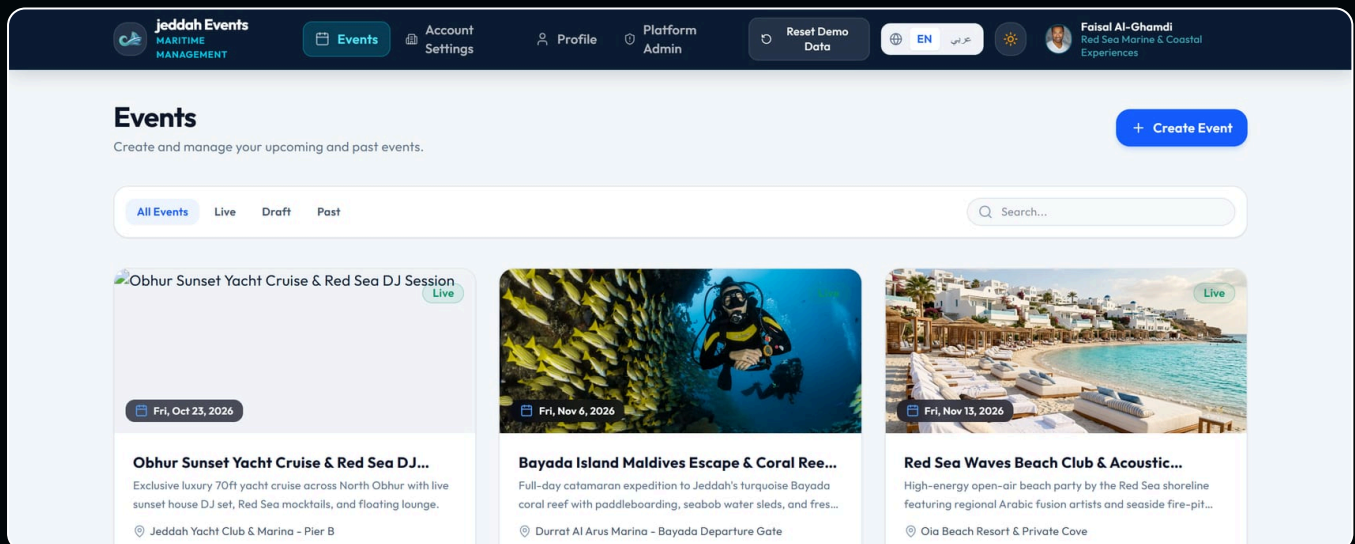

08 — OPERATOR CONSOLE

Your side of the platform.

Everything the storefront sells, your team administers from one console — event creation, ticket tiers, orders, attendees, promo codes, custom questions, broadcast messaging and analytics.

EVENT DASHBOARD Revenue, tickets sold against capacity, order count and live check-in rate, with per-tier sales progress and one-click access to door check-in.

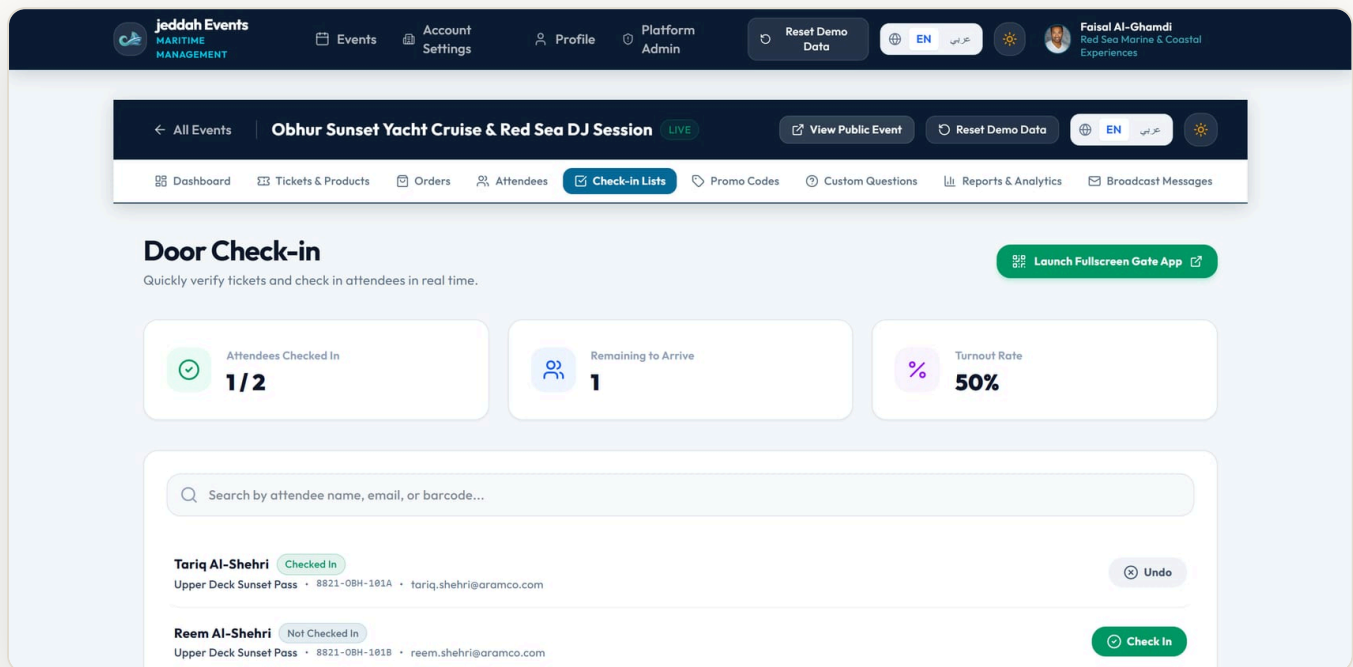

PORTFOLIO VIEW Every event across the season — live, draft and past — each showing tickets sold and gross revenue at a glance. Built for operators running a calendar, not a single night.

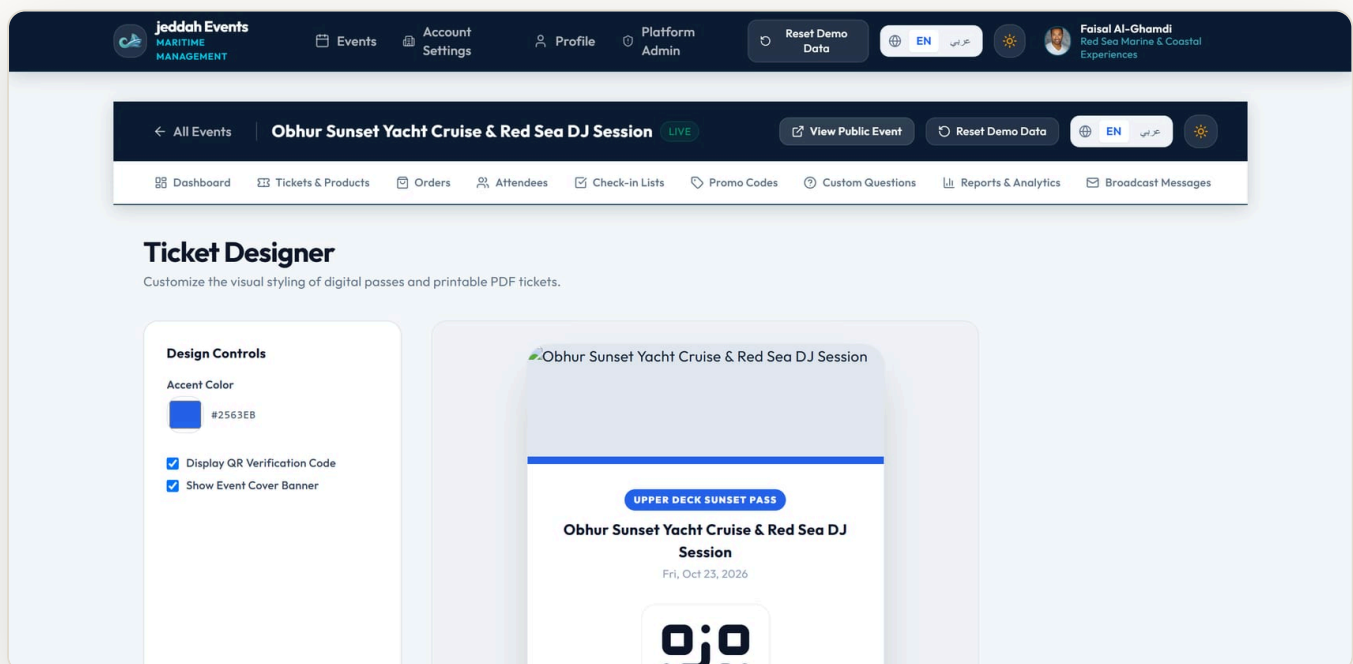

09 — GATE OPERATIONS

From sale to gate, on one system.

The pass a guest buys online is the pass your gate staff scan at the pier. No exported lists, no printed spreadsheets, no radio call to the office to confirm a name.

DOOR CHECK-IN Search by name, email or barcode. Live turnout rate and remaining arrivals update as guests are admitted, with single-tap check-in and undo. A fullscreen gate mode runs on a tablet at the entrance.

TICKET DESIGNER Brand the digital pass and printable PDF ticket to your own accent colour and cover art, with QR verification codes issued per attendee.

10 — DELIVERY

Live in seven days. Maximum.

Because the platform is already built and proven, the engagement is configuration and handover — not construction. Seven calendar days from signed brief to a live storefront taking real bookings.

1

DAY 1**Brief & asset intake**

Inventory list, pricing tiers, capacities, marina locations, brand assets, Arabic copy and payment gateway credentials collected in a single working session.

2

DAYS 2 - 3**Configuration & branding**

Your catalogue built out across the relevant verticals, brand palette and typography applied, Arabic and English copy loaded, ticket and pass design set to your identity.

3

DAYS 4 - 5**Payments, VAT & compliance wiring**

Payment methods connected and tested end to end, VAT and invoicing verified, guest identity capture and manifest generation configured to your operating requirements.

4

DAY 6**Staff walkthrough & rehearsal**

Console training for your operations team, a live gate check-in rehearsal on real devices, and a full test booking pushed through from storefront to door scan.

5

DAY 7**Go live & handover**

Production deployment on your domain, monitored launch, and handover of documentation and admin credentials. Support period begins.

COMMITMENT

Seven days is a **ceiling, not an estimate**. If the brief and assets arrive on Day 1, most single-vertical deployments complete in four to five.

11 — INVESTMENT

Support priced for a full season.

TECHNICAL SUPPORT · 12 MONTHS

5,000 SAR

One flat annual fee. No per-booking commission, no per-seat licence, no percentage of your gate.

What the annual support covers

Bug fixes and defect resolution Reported issues investigated and resolved throughout the term	Included
Platform, security and dependency updates Framework and library maintenance to keep the deployment current	Included
Seasonal content & catalogue updates New events, tiers, pricing and capacity changes as your calendar moves	Included
Operator support & staff retraining Direct access for your operations team, including new-staff onboarding	Included
Uptime monitoring & incident response Production monitoring with priority response during live event windows	Included

Deployment

Platform deployment & configuration Seven-day delivery as scheduled on the previous page	Quoted on brief
Third-party costs Payment gateway fees, domain and hosting — billed at cost, directly to you	At cost

NOTE

The one-time deployment fee is quoted against your specific brief — how many verticals you run, the size of your catalogue, and whether you need custom brand work beyond the standard theming. **The 5,000 SAR annual support figure is fixed and does not vary with deployment scope.**

12 — ENGAGEMENT

Working with a licensed independent developer.

You deal directly with the person who builds and maintains the platform. No account manager, no delivery pod, no handover to a junior team after signature.

01

Licensed & invoiceable

Operating under a Saudi freelance licence — able to contract directly with Saudi businesses and issue compliant invoices for your records.

02

Built, not assembled

The platform in these screenshots is a working product, not a template purchased and re-skinned. It can be extended where your operation needs it.

03

One point of contact

The developer who ships your deployment is the developer who answers when something needs attention during the season.

04

No revenue share

Flat fees only. Your ticket revenue is yours — the platform never takes a cut of the gate.

Next steps

- **A 30-minute walkthrough.** A live demonstration of the platform against your own inventory, at your marina or by video call.
- **A written scope and fixed quote.** Issued within 48 hours of the walkthrough, with the seven-day delivery window confirmed against a start date.
- **Deployment begins on signature.** The clock starts the day the brief and assets are in hand.
